OUR SOLUTIONS FOR YOU

STORAGE + HANDLING

- Central cone silos ■ Steel silos
- Mechanical material transport
- Pneumatic conveying systems
- Mixing plants for dry bulk products
- Bulk loading and unloading systems (ship, truck and train)
- EPC – Contracting for Complete Terminals and Plants

MIXING

- Dissolver mixers
- Triple shaft mixers
- Coaxial mixers
- Lab mixers
- Turnkey mixing plants for pasty and liquid products

FILLING

- Drum filling systems
- Pallet and IBC filling systems
- Pail filling systems
- Can filling systems
- Complete intralogistics solutions

PACKING

- Semi-automatic, automatic and high performance packing systems for powdery products using all types of valve bags, FFS bags, open mouth bags, PE bags and big bags in weights ranging from 1 kg to 2000 kg.

PACKING

- Complete packing lines for granular products using all types of FFS bags, open mouth bags and big bags in weights ranging from 25 kg to 2000 kg.

PALLETIZING + LOADING

- Bag palletizing systems using layer deposit, automatic grippers and robot technology for overhead or on-ground feeding arrangements
- Automatic truck, container and train loading systems
- Complete end of line solutions

OUR SOLUTIONS FOR YOU

SCREENING SYSTEMS

- Scalping, classifying, fine-screening and reject screening systems using eccentric, concentric, exciter, unbalanced motors and high-frequency drive technologies
- Turnkey screening plants

WASHING SYSTEMS

- In-line washing systems using high-pressure water jet and friction technologies
- Turnkey washing plants

PELLETIZING SYSTEMS

- Intelligent pelletizing systems using automatic side-wall height, speed and inclination adjustments
- Turnkey pelletizing plants

ENGINEERED SCREEN MEDIA

- Polyurethane, rubber, perforated plate and specialty screen media in tensioned, modular or customized configurations
- Quick tensioning systems for vibrating screens

HIGH VIBRATION WIRE SCREENS

- High Vibration Wire Screens lower the cost of production per ton by using wires that vibrate independently
- Manufactured by MAJOR, available for tensioned and modular screen decks

WOVEN WIRE SCREENS PARTICLE ANALYSIS

- Woven wire screen media in tensioned configurations; Pre-tensioned frames; Ultrasonic screening systems
- Sieve Analysis, dynamic image analysis and sample divider

ENGINEERED SCREEN MEDIA - HIGH VIBRATION WIRE SCREENS - WOVEN WIRE SCREENS - PARTICLE ANALYSIS
